

Key Features

- Manufactured to customer Specification
- Temperature range up to 1200 °C
- Quick manufacture time

Sensor Specifications and Configurations

Thermocouple Types available	J, T, K, E, N
Temperature ranges available	0 - 220 °C (not mineral insulated) 0 - 2000 °C (mineral insulated)
Junction configuration available	Insulated, Grounded, Exposed
Junctions Assembly	Simplex, Duplex
316 Stainless Steel Probe Diameters	3, 4.8, 6, 8, 10, 12, 16 mm

Colour Coding

	United States		IEC 60584-3	
	Thermocouple Grade	Extension Grade	Thermocouple Grade	Intrinsically Safe
Type K				
Type T				
Type J				
Type N				
Type E				

Available Versions

- Aluminium Head
- Spring Loaded
- Straight Probe
- Bayonet
- Other types available on request

Applications

- Industrial Machinery
- Automation
- Industrial Processes
- Factories
